Tour Manager with over 20 years across every scale of live music, from clubs to arenas, amphitheaters, and stadiums, with international touring on multiple continents. Started in audio engineering, then moved into full-time tour management. Strongest behind the scenes: building structure, staying ahead of problems, and keeping the team set up to do their jobs well. Comfortable with budgets, compliance, logistics, and the details that get overlooked until they cost someone. In 2026, founded and built ATOM Interstate, touring software for the financial and operational side of the road.

AREAS OF FOCUS: Budgeting, accounting & reconciliation · Routing against real numbers (miles, hours, cost) · DOT, union, labor & payroll compliance · Venue & promoter coordination, contracts · Daily operations, personnel & ground logistics · VIP, hotel blocks & travel · Building systems the next person can run
